

I set up my business Wheatcroftwillow in 2008 after making baskets and willow items as a hobby for 16 years.

I am passionate about using local and sustainable materials, I gather wild materials around my home in the Staffordshire Moorlands, use suppliers in Nottingham and Derbyshire and have started growing my own willow. I also use Somerset growers when I run out of local materials.

I like to use different varieties of willow in my baskets, Black Maul, Flanders Red, Wizzerder, Green Dicks, Dark Dicks, Jagiolonka, Brittany Green and I often label up my baskets with the varieties used and often where they were gathered.

At present I am undertaking an apprenticeship with Adrian Charlton, a professional Norfolk maker of 30 years to further my knowledge and skills.

My product range is forever growing, if there is something not on the list, please call or email and I will give you a price or pass you onto another local maker who can make what you want.
